PRINCE JOHN GANDOLLAS

Full-Stack Engineer

Binangonan, Rizal, Philippines | +63 976 134 4061 | pgandollas@gmail.com

LinkedIn: linkedin.com/in/pjdevph | GitHub: github.com/pjDevph

PROFESSIONAL SUMMARY

Full-Stack Engineer with nearly two years of hands-on development, delivering three production client platforms at FINDXNY across web, mobile and backend. Strongest in server-authoritative design: multi-tenant access control (RBAC/RLS), idempotent payments and webhooks, offline-first sync, and pricing and availability engines, using TypeScript, Next.js, React Native (Expo), NestJS, GraphQL, Supabase, Firebase, PostgreSQL and MongoDB. Four years teaching web development and a biomedical engineering background sharpen documentation and production troubleshooting.

TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript, SQL, HTML5, CSS3, React, Next.js, React Native, Expo, Tailwind CSS

Backend & Data: Node.js, Express.js, NestJS, Deno, GraphQL, REST APIs, PostgreSQL, SQLite, MongoDB, Redis, Supabase, Firebase

Cloud & Delivery: Google Cloud Platform, Vercel, EAS Build, EAS Update, Git, GitHub, GitHub Actions, Electron

Architecture & Integrations: Multi-Tenant Architecture, RBAC, RLS, Offline-First Sync, Webhooks, Idempotency, Xendit, Google Maps API, ESC/POS, Custom Expo Modules

SOFTWARE ENGINEERING EXPERIENCE

Junior Full-Stack Engineer | FINDXNY **May 2025 – Sept 2026**

Delivered three client platforms end to end across web, mobile and backend: FINDXNY OS and Athlete Central as the sole developer, Lalaba within a small engineering team.

FINDXNY OS (client: MugTheMug) **May 2026 – Sept 2026**

Next.js · React Native (Expo) · Supabase · PostgreSQL · Deno Edge Functions · Xendit · EAS

- Developed a multi-tenant POS and booking platform across a Next.js web app, an Expo cashier/kitchen terminal, and a Supabase backend with ~115 Edge Functions and 119 database migrations serving multiple business branches.
- Designed workspace-, branch- and role-based access for owners, admins, managers, cashiers and kitchen staff using PostgreSQL RLS, Edge Function middleware, route gating and PIN-based terminal login.
- Built a SQLite-backed offline sync queue with idempotent replay and recovery; authored native Expo modules for ESC/POS printing, cash drawers and secondary displays; integrated Xendit webhook deduplication, server-side pricing, EAS Build and OTA releases.

Lalaba **Oct 2025 – Aug 2026**

NestJS · GraphQL · MongoDB · Redis · React Native (Expo) · Next.js · Firebase · Xendit · Google Cloud

- Developed a multi-role laundry marketplace with a NestJS/GraphQL backend, React Native customer and partner apps, and a Next.js admin platform for customers, shop staff and independent service providers.
- Designed branch-aware, permission-scoped authorization with staff device approval, plus server-side platform-fee and per-provider booking/availability engines that keep pricing and capacity consistent across clients.
- Integrated Xendit (idempotent wallet top-up webhook), Firebase Auth/Storage/App Check/Push and Google Maps; diagnosed Google Cloud/Firebase production configuration incidents and ran multi-environment EAS Build and OTA flows.

Athlete Central **May 2025 – Sept 2025**

Next.js · React Native · Electron · Firebase · TypeScript · Tailwind CSS

- Designed a shared Firebase Cloud Functions backend for customer web/mobile, Android POS and Electron admin clients, centralizing schedules, bookings and domain models across facilities.
- Built a multi-facility, multi-date booking cart with continuous time-slot merging and live availability; centralized standard, peak, weekend, holiday, entrance-fee and promotional pricing while separating booking and payment lifecycles.

ADDITIONAL EXPERIENCE

Special Science Teacher I | Department of Education **Apr 2021 – Apr 2025**

Taught senior high school web development (HTML, CSS and JavaScript), plus programming, Science and Mathematics, through project-based learning.

Biomedical Engineer | Iraseth Pharma Inc. **Dec 2019 – Mar 2021**

Preventive maintenance, troubleshooting, repair and technical support for biomedical equipment across partner healthcare facilities.

EDUCATION & TRAINING

Bachelor of Science in Electronics Engineering | University of Rizal System **Apr 2019**

Full-Stack Web Development (MERN) | Zuitt Tech Program **Jan 2025 – Apr 2025**

Built production-level full-stack applications with MongoDB, Express.js, React and Node.js.
